Form10BD Data Cleaner Tool – User Manual

Overview

The **Form10BD Data Cleaner Tool** is a secure, web-based application developed to validate and standardize donor-related data in Form 10BD Excel returns. The tool automates the checking and formatting of Unique Identification Numbers (UIDs), updates the ID Code based on UID type, standardizes dates, and cleans character fields — significantly reducing manual intervention and ensuring consistent and compliant reporting.

Features

1. UID Validation & ID Code Auto-Correction

- Identifies PAN, Aadhaar, Passport, and Driving Licence formats.
- Auto-updates the ID Code to match UID type.
- Inserts default PAN if UID is missing.

2. Data Cleaning

- Removes special characters and truncates lengthy text fields.
- Formats dates to DD-MMM-YYYY.
- Converts donation amounts to clean numeric values.

3. File Upload and Batch Processing

- Accepts .xlsx files in Form10BD format.
- Batch validation of donor records with in-app review.

4. Output Format

- View cleaned data in a tabular format in-app.
- Download as a professionally formatted Excel file.

5. Error Handling

- Displays detailed error messages for invalid or missing columns.
 - Adds a “Change Note” column to indicate changes for audit traceability.
-

Usage Instructions
